

Calseadigest+

Your capital deserves more than a simple mineral block

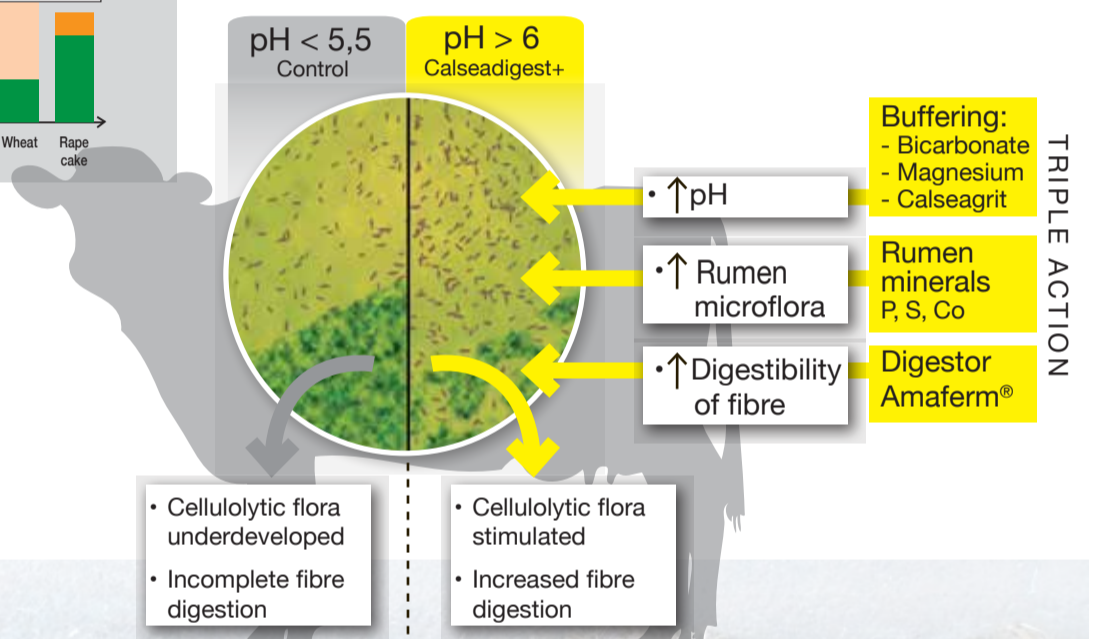

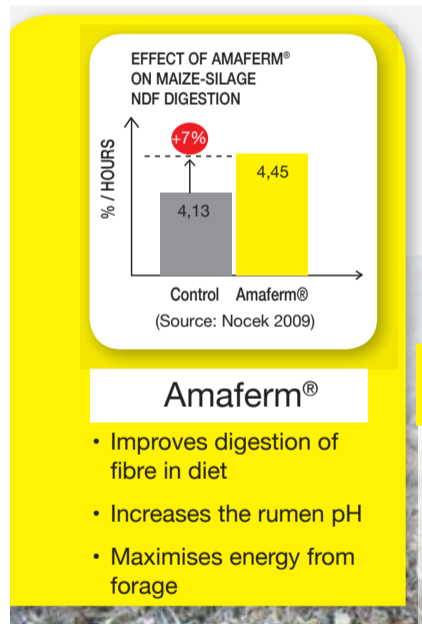

EXCLUSIVE Rumen Complex. Triple-action buffering: Sodium bicarbonate, magnesium, and Calseagrit. **Contains AMAFERM®. Digestibility enhancer.**

Action of Calseadigest+

Good utilisation of forage is a function of pH control within rumen

- BENEFITS**
- Reduces risk of acidosis
 - Positive effects on health and reproduction
 - Optimises feed efficiency
 - Reduces feed costs

Bicarbonate	P, S, Co	Calseagrit Biotech	Sodium	Cu, Zn, Mn, I, Se
<ul style="list-style-type: none"> • Buffering • Stimulates cellulolytic flora 	<ul style="list-style-type: none"> • Rumen minerals • Stimulates rumen microflora 	<ul style="list-style-type: none"> • Supports ruminal fermentation • Provides highly digestible calcium 	<ul style="list-style-type: none"> • Self-regulation • 3 additional sources of sodium • Increases salivation and production of bicarbonate through licking 	<ul style="list-style-type: none"> • Meets the needs of highly productive cows • Supports immunity • Reduces stress

RUMEN COMPLEX

COMPOSITION

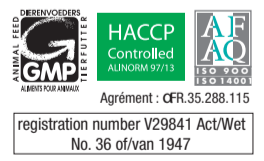

Constituents	Trace elements (mg/kg)
Calcium 7,5%	Zinc 9750
Sodium 19,5%	Manganese 4000
Phosphorus 2%	Copper 1625
Magnesium 2,4%	Iodine 100
Sulphur 1%	Cobalt 40
Digestibility enhancer (mg/kg)	Selenium 10
AMAFERM® 5000	

FORMULATION

- Calseagrit & Biotech (seaweed complex)
- AMAFERM® (n°CE 4a2) Aspergillus oryzae fermentation extract
- 3 sources of sodium (bicarbonate, sulphate, chloride)
- Highly digestible mineral salts

PRESENTATION

15-kg mineral lick block

TARGET SPECIES

	CATTLE	GOATS
Average consumption	10-15 g / 100 kg live weight	8-12 g / adult
Number of blocks to place to avoid overcrowding	1 block per 20-25 animals	1 block per 100-150 animals

Intake could possibly be high during week 1 and 2 if animals' requirements are high, but will then come in line. To avoid possible overconsumption, provide loose coarse salt separate of feed 3-5 days prior to placing blocks.

INSTRUCTIONS FOR USE

- Distribution:** Self-service
- Recommended Usage:** Animals grazing on harvested crop fields
- Supplement of diets high in:
- Silage (rich in sugar & acid)
 - Cereals (high in starch)
