

CALSEABLOC®
Animal Nutritional Specialties
Nutritional activator

Calsea mag+

Your Equine partner deserves more than just a simple mineral block

Fix'N Complex for decreased ammonia production.

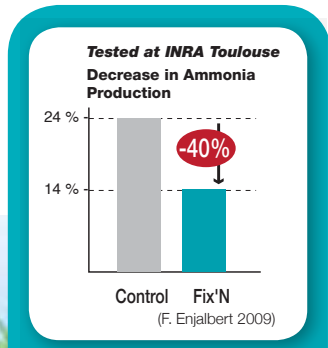

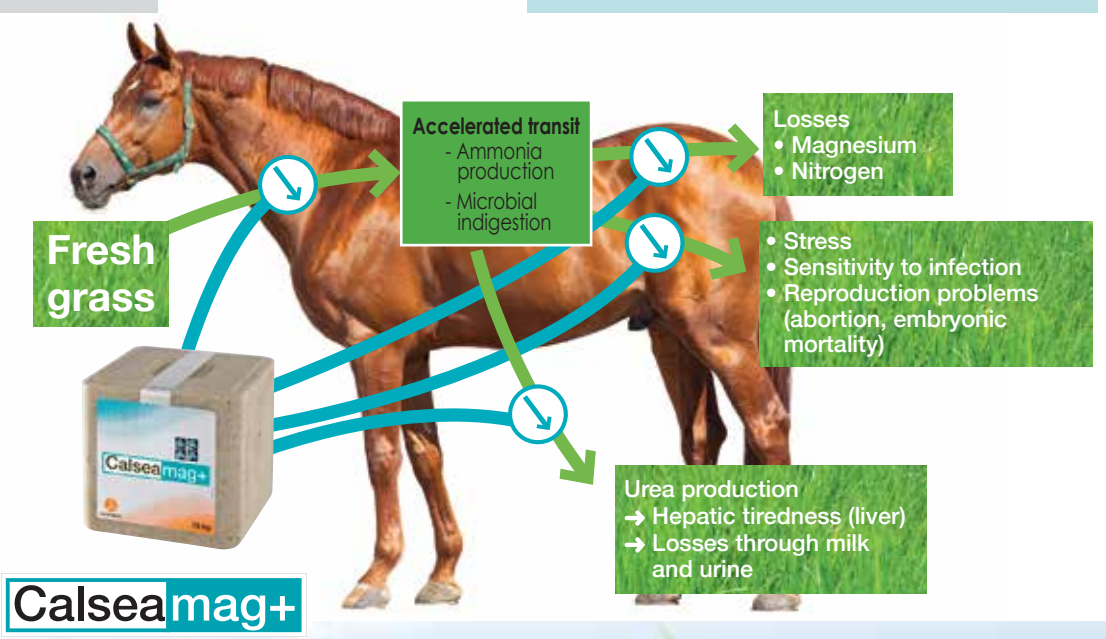

- ### ISSUES
- Increased hyperactivity
 - Accelerated intestinal transit
 - Ammonia excess
 - Magnesium misabsorption
 - Nutritional imbalance
 - Environmental and nutritional stress
 - Decrease in immunity and fertility

Calsea mag+

MODE OF ACTION

- ### BENEFITS
- Mineral and nitrogen valorisation of fresh grass and concentrate feeding
 - Improves utilization of available feed
 - Supports immunity and fertility
 - Improves performance
 - Decreases excitability

- Urea free**
- Rain resistant - will not melt in rain**
- Animals cannot bite blocks**

- ### Fix'N
- Decreases Ammonia production
 - Regulates Nitrogen flow
 - Optimises Nitrogen usage

CALSEAGRIT BIOTECH	SODIUM BASE	VITAMIN E-SELENIUM	MAGNESIUM
<ul style="list-style-type: none"> • Supports digestion • Optimises diet • Provides highly digestible Calcium 	<ul style="list-style-type: none"> • Self regulation • Supports appetite and digestion • Synergy with Magnesium 	<ul style="list-style-type: none"> • Antioxidant action • Supports fertility and immunity • Improves foetus viability • Enhances vaccine efficiency 	<ul style="list-style-type: none"> • Reduces stress (calming effect) • Improves performance • Synergy with Sodium and Calcium

COMPOSITION

Constituents		Trace Elements (mg/kg)	
Calcium	15%	Zinc	2 625
Magnesium	10%	Manganese	2 200
Sodium	7%	Iodine	100
Vitamin (mg/kg)		Copper	50
Vitamin E	400	Cobalt	40
		Selenium	10

PRESENTATION

15 kg mineral licking block

TARGET SPECIES

- ### FORMULATION
- Calseagrit & Biotech (seaweed complex)
 - Fix'N complex (herb extracts and mineral binder)
 - Antioxidants (Zn, Cu, Se and vitamin E)
 - Highly digestible mineral salts
-
- Agrement : CFR.35.288.115
registration number V28279 Act/Wet No. 36 of/van 1947

- ### INSTRUCTIONS FOR USE
- Distribution:** Self-service
- Requirements:** 1 block for 2 average 500kg horses for 4 months
- Recommended Usage:**
- Fresh grass feeding
 - Soluble Nitrogen-rich diets
 - Leguminous feeds
